

Survey Title: Pet Store Adoption-Education Events

Q20: Please give us any suggestions you'd like for future shelter surveys.

Response

deslorelin implant side effects

Vaccine survey-titers etc. Who vaccinates older, or ferrets on med.

Vet costs.
Operational costs.
Adoption requirements.

How about years of experience in the ferret world by those involved with the organizations. For me it will be 28 years this October first.

I think that right now .. a good survey would be how the shelters are dealing with the shortage of the distemper vaccine and veterinarians that refuse to use the alternative that is available. How are they handling adoptions due to this?

What software do others use to track donations, ferrets, medical history, etc?
How do they organize all that bedding and such?

surveys where we can see what trends other shelters may be dealing with, such as: reasons for surrendering; how informed were the people when they got their ferret; diseases, food issues etc.

Ok for now

Putting up a simple sign telling when the shelter will be there next days in advance. Keeping our business cards there for anyone that wants one.

On site events - what for and when

Let's do a survey of adoption and surrender fees! It would be interesting to see who charges what in various places, and it would be applicable to international shelters.
